Cytotechnology

Volume 22, Nos. 1–3, 1996

Special Issue: Cell Culture Engineering V

Guest Editor: D. ROBINSON

Introduction 1–2

Engineering challenges in high density cell culture systems
Sadettin S. Ozturk 3–16

Analysis of recombinant glycoproteins by mass spectrometry
David C. James 17–24

Development of a serum-free medium using computer-assisted factorial design and analysis
Mio-Sam Lao & Calvin Schalla 25–31

Effect of endogenous methylglyoxal on Chinese hamster ovary cells grown in culture
Frank W.R. Chaplen, William E. Fahl & Douglas C. Cameron 33–42

Degradative activities in a recombinant Chinese hamster ovary cell culture
Mio-Sam Lao, Derek Toth, Glenys Danell & Calvin Schalla 43–52

Dissolved carbon dioxide accumulation in a large scale and high density production of TGF β receptor with baculovirus infected *Sf-9* cells
Alain Garnier, Robert Voyer, Rosanne Tom, Sylvie Perret, Barbara Jardin & Amine Kamen 53–63

CO_2 in large-scale and high-density CHO cell perfusion culture
David R. Gray, Su Chen, William Howarth, Duane Inlow & Brian L. Maiorella 65–78

Assessment of virus infection in cultured cells using metabolic monitoring
Rahul Singhvi, Julia F. Markusen, Bonnie Ky, Brian J. Horvath & John G. Aunins 79–85

Homogenisation and oxygen transfer rates in large agitated and sparged animal cell bioreactors: Some implications for growth and production
Alvin W. Nienow, Christian Langheinrich, Neil C. Stevenson, A. Nicholas Emery, Timothy M. Clayton & Nigel K.H. Slater 87–94

Characterization of agitation environments in 250 ml spinner vessel, 3 L, and 20 L reactor vessels used for animal cell microcarrier culture
Raghavan V. Venkat & Jeffrey J. Chalmers 95–102

Insights into protective effects of medium additives on animal cells under fluid stresses: the hydrophobic interactions
Jianyong Wu 103–109

Human diploid fibroblast growth on polystyrene microcarriers in aggregates
James Varani, Sean Josephs & William J. Hillegas 111–117

Lysis-free separation of hybridoma cells by continuous disc stack centrifugation
H. Tebbe, D. Lütkemeyer, F. Gudermann, R. Heidemann & J. Lehmann 119–127

Comparison of the production of a human monoclonal antibody against HIV-1 by heterohybridoma cells and recombinant CHO cells: A flow cytometric study
Nicole Borth, Karl Strutzenberger, Ute Donalies, Renate Kuner & Hermann Katinger 129–138

Super CHO **– A cell line capable of autocrine growth under fully defined protein-free conditions**
S.C.O. Pak, S.M.N. Hunt, M.W. Bridges, M.J. Sleigh & P.P. Gray 139–146

Regulation of cell growth by IRF-1 in BHK-21 cells
Sabine Kirchhoff, Andrea Kröger, Helder Cruz, Meike Tümmler, Fred Schaper, Mario Köster & Hansjörg Hauser 147–156

Controllable genetic manipulation of apoptosis of cells in culture
Trevor Littlewood, Nicola McCarthy, Moira Whyte, Stella Pelengaris, Claerwen James & Gerard Evan 157–167

Bcl-2 inhibits apoptosis and extends recombinant protein production in cells infected with Sindbis viral vectors
Alison J. Mastrangelo, J. Marie Hardwick & Michael J. Betenbaugh 169–178

Foreign protein expression from S phase specific promoters in continuous cultures of recombinant CHO cells
Gautam G. Banik, Paul W. Todd & Dhinakar S. Kompala 179–184

Kinetics of retroviral production from the amphotrophic Ψ CRIP murine producer cell line
Bing Q. Shen, Michael F. Clarke & Bernhard O. Palsson 185–195

Genetic engineering of α2,6-sialyltransferase in recombinant CHO cells and its effects on the sialylation of recombinant interferon-γ
Lucia Monaco, Annie Marc, Alex Eon-Duval, Giulia Acerbis, Gianfranco Distefano, Damien Lamotte, Jean-Marc Engasser, Marco Soria & Nigel Jenkins 197–203

Blocking adhesion of cancer cells to endothelial cell types by *S. agalactiae* type-specific polysaccharides
Katsuhide Miyake, Shin Yamamoto & Shinji Iijima 205–209

Effect of lipids on insect cell growth and expression of recombinant proteins in serum-free medium
Rebecca S. Gilbert, Yuichi Nagano, Tadafumi Yokota, Sun Fon Hwan, Tom Fletcher & Ken Lydersen 211–216

In vitro **production studies with a wild-type *Helicoverpa* baculovirus**
Shukla Chakraborty, Paul Greenfield & Steven Reid 217–224

The effect of dissolved oxygen tension and the utility of oxygen uptake rate in insect cell culture
Laura A. Palomares & Octavio T. Ramirez 225–237

Large scale production of recombinant mouse and rat growth hormone by fed-batch GS-NS0 cell cultures
Weichang Zhou, Theodora Bibila, Konstantin Glazomitsky, Javier Montalvo, Christine Chan, Daniel DiStefano, Sonal Munshi, David Robinson, Barry Buckland & John Aunins 239–250

Ammonium ion transport – a cause of cell death
Kristina Martinelle, Anna Westlund & Lena Häggström **251–254**

Continuous, high capacity reconstitution of nutrient media from concentrated intermediates
David W. Jayme, James M. Kubiak, Todd A. Battistoni & David J. Cady **255–261**

The growth and phenotypic expression of human osteoblasts
Craig R. Ruder, Patricia Dixon, Antonios G. Mikos & Michael J. Yaszemski **263–267**
